Workshop		9:00 am - 12:00 pm
Lunch (on your own)		12:00 pm - 1:00 pm
Workshop		1:00 pm - 4:00 pm

The DSM-5™ represents a fundamental shift in how disorders are conceptualized and diagnosed. The workshop provides an overview of the manual's new organization, other innovations such as spectrum disorders and the relationship between DSM-5™ and the ICD. Participants learn the nuts and bolts of using the manual and coding a DSM-5™ diagnosis. The program reviews major classes of psychiatric disorders with particular attention paid to significant changes in the diagnostic criteria. Throughout the workshop participants are given opportunities to practice making a diagnosis using the new system.

Objectives

This workshop will review all the major changes associated with the transition from the DSM-IV™ to the DSM-5™. Special emphasis will be placed on changes to the overall diagnostic system including the implications of the elimination of the 5-Axis diagnostic system and an increased emphasis on assessment, development and cultural dimensions. Changes across each DSM™ chapter will be highlighted. There will be time devoted to practicing writing out diagnoses using the new system. Information about an implementation timeline will also be discussed.

Objectives:

- Learn diagnostic procedures using the DSM-5™ including new assessment, elements, and coding.
- Learn differences between DSM-IV™ and DSM-5™ disorders.
- Increase knowledge in the relationship between symptoms and treatment planning.
